### Description

When connected through vnc I am able to open new terminal windows with W-Enter, I can change tabs by clicking them with the mouse, but am unable to type in the terminal windows.  It is almost if the window isn't being focused.  I can copy and paste with the mouse in the terminals, but still unable to type.

## History

**#1 - 07/02/2012 05:10 PM - Christoph Kappel**

I need more information here:

- What VNC client?
- Connecting to/from subtle?
- Version of subtle subtle

**#2 - 01/04/2018 12:15 PM - Christoph Kappel**
