Category:	Bugfix		**Estimated time:**	0.00 hour
Target version:	Nu			

Description

For example I merge two views: terms & web.
When I am on the 'web' I do gravity left browser and gravity right with urxvt. Than if urxvt have focus I unmerge 'term' and statusbar show 'ncmpcpp'. So, keyboard don't react while I don't set focus to firefox by the mouse manually . Also this bug arise sometimes yet, when I don't use merger, but I can't explain reason why.

My subtle version is 0.10.2876. Please excuse my English.

Hum, when does the focus loss happen exactly? I need to be able to reproduce that or otherwise I cannot fix it.
