

subtle - Bug #320

Problem with Subtlex::View.current not updating; :client_kill doesn't track dialog boxes

12/18/2018 02:36 PM - Alessa Norman

Description			
<p>Per attached file, I'm trying to track how many clients are active on the current view so I can show that number on my panel. When I switch to an empty view, the View.current variable doesn't update. So View.current will return the last populated client until I switch to another populated client.</p> <p>If I'm in a view with clients and I close out all the clients, it tracks that correctly and View.clients.length shows a 0 as expected.</p> <p>Also, if I open a dialog box as I just did (from Firefox) to attach numwin.rb to the ticket, View.current.clients.length is incremented, but does not show as decremented until I switch to a different view and back, so probably some dialog boxes are seen by on :client_create but not by on :client_kill.</p> <p>Let me know if you want me to split these up into subtopics or stick them somewhere else.</p>
