Target version:			
Description			
Hi It would be very great if you can extend subtlr oder subtle itself to load a sublet at runtime.			

History

#1 - 07/12/2009 10:03 PM - Christoph Kappel

- Target version set to 1
- Priority changed from Urgent to High
- Assignee set to Non member users

I will add this later - some things have a higher priority.

#2 - 07/17/2009 02:46 PM - Christoph Kappel

- % Done changed from 0 to 100
- Status changed from Unconfirmed to Fixed

Sarting with #1164 subtlr can load sublets as follows: subtlr -s -a foobar.rb

This sublets must be in the sublet loading path and the name cannot be longer then 20 chars.
